

CORPORATIVE POLICY

Prevention and Environmental Policy

OCB Pharmaceutical is a chemical company dedicated to the manufacture of bismuth compounds products. As part of OCB's commitment to society, one of the Company's main strategic priorities driving its daily activities is the prevention of occupational risk and respect for the environment, including energy performance.

To this end, the following basic principles are established:

1. Commitment to the safety, health, and well-being of employees, as well as to environmental protection, promoting their integration into the company's daily work processes.
2. Efficient and sustainable management of resources, the use of renewable energy, and commitment to climate change mitigation and adaptation through greenhouse gas emission reduction programs.
3. Commitment to the continuous improvement of environmental management and occupational health and safety management at OCB, enhancing overall performance while complying with applicable legal requirements and other requirements voluntarily adopted by OCB.
4. Establishment of periodic programs, with objectives and targets aligned with applicable regulations and with the risks and opportunities identified in the areas of occupational risk prevention and environmental protection.
5. Training, involvement, and participation of OCB personnel and collaborating companies in the implementation of the principles contained in this Policy.
6. Ensuring the availability of information and necessary resources, as well as the proper planning of their use.
7. Occupational risk prevention and environmental protection are company objectives; therefore, responsibility for achieving them lies with all OCB employees, regardless of their position or function.
